

The Process Overseas

Your medical travel journey can be easy and hassle free, in these steps we outline for our clients how simple and painless the process can be.

1. Welcome to the Airport

Upon landing, you will be greeted by your In-Country Liaison: They are there to guide you through the admission and procedure process as well as be your personal tour guide. Your liaison will take care of all your transportation and communication needs and will take you directly to your hotel and the hospital.

2. Admission Process:

Once you have settled into your destination of choice, your in-country liaison will then take you to the medical facility to meet with your medical team. You'll make payment to the hospital and have your procedure explained in detail by your lead doctor. They will also run pre-op tests at this time to ensure your medical condition has not changed since your records were submitted.

3. Your Medical Procedure:

We will be in contact with your medical team throughout your stay and frequently inform your loved ones of your procedure status.

4. Recovery:

You will be closely monitored while you recover in your destination of choice and after the first initial day, depending on the procedure, can continue your recovery in your four or five star luxury hotel.

5. Return Travel:

Upon receiving clearance from your medical team, we will confirm your return travel arrangements. All you have to do is pack and board the plane! Our in-country staff will take care of the rest.

6. USA Follow-Up Care:

You will be in touch with your USA medical team, this team will conduct additional follow up appointment to assess your progress and administer any treatment should follow-up care be needed.

7. Remain Your Point Contact:

International Med Retreat remains as your liaison with your overseas medical team for as long as you need!
